

Make Disciples of All Nations

BASIC COMPUTING

Unit 4 Advanced Concepts in word processing

Table of Contents (TOC)

Definition

- A list of document headings and their page numbers.
- Generated automatically based on heading styles (Heading 1, Heading 2, etc.).

Table of Contents (TOC)

Steps to Create (MS Word / Google Docs)

- Apply heading styles to section titles.
- Place the cursor where TOC should appear (usually after the title page).
- Insert → Table of Contents (choose style).
- Update TOC after editing document (Right-click → Update Field in Word / Refresh in Docs).

Table of Contents (TOC)

Benefits

- Saves time in navigation.
- Updates automatically when content changes.
- Professional look for long documents.

Table of Figures / Tables

Definition

- A list of all figures or tables with page numbers.
- Helps readers quickly locate illustrations, charts, and tables.

Table of Contents (TOC)

Steps to Create (MS Word / Google Docs)

- Insert captions: References → Insert Caption (label as Figure or Table).
- After labeling all items, go to References → Insert Table of Figures.
- Choose formatting (style, leader dots).
- Update when figures/tables are added or removed.

Google Docs Alternative

- Manually create captions below figures/tables.
- Use bookmarks and hyperlinks to simulate a table of figures.

Citations & Bibliography

Definition

- Citations: References to sources used in the document.
- Bibliography/Works Cited: A compiled list of all references.

Citations & Bibliography

Steps in MS Word

1. Go to References → Manage Sources.
2. Add new sources (book, journal, website, etc.).
3. Insert in-text citation where needed.
4. At the end, choose References → Bibliography / Works Cited.
5. Select citation style (APA, MLA, Chicago, etc.).

Citations & Bibliography

Benefits

1. Avoids plagiarism.
2. Ensures academic credibility.
3. Automatically formats references in chosen style.

Inserting and Managing Page Numbers

Definition

- Page numbering is used to label pages in a document.
- You can insert numbers in the header, footer, or margins.

Why Different Numbering?

- Title pages often need no number.
- Preface/contents may use Roman numerals (i, ii, iii).
- Main body uses Arabic numbers (1, 2, 3).

Inserting and Managing Page Numbers

Steps (MS Word)

1. Go to Insert → Page Number.
2. Choose position (Top, Bottom, Margins).
3. To use different numbering styles:
 - Insert a Section Break (Layout → Breaks).
 - Unlink headers/footers between sections.
 - Apply desired numbering style (Roman/Arabic).
4. Update if document structure changes.

Inserting and Managing Page Numbers

Steps (Google Docs)

1. Insert → Page Numbers.
2. Choose location and format.
3. To skip first page (like title): check “Different first page” option.
4. For more control (like Roman numerals), add section breaks and format separately.

Inserting and Managing Page Numbers

Benefits

- Professional presentation of reports, theses, books.
- Easy navigation for readers.
- Supports mixed document structures.

• PRACTICE QUESTIONS 1

"Chapter 1: Introduction to Advanced Word Features

Word processing software has evolved significantly, offering a suite of powerful tools beyond basic text entry. These advanced features are crucial for creating professional, well-structured documents.

Section 1.1: Document Navigation

Efficient navigation in long documents relies on proper heading structures and a functional Table of Contents. This allows readers to quickly jump to relevant sections.

Section 1.2: Referencing and Citations

Academic and professional integrity demands accurate referencing. Word's built-in citation tools simplify the process of crediting sources and generating bibliographies.

Chapter 2: Enhancing Visual Presentation

Beyond text, visual elements like figures and tables can greatly enhance document clarity. Proper captioning and a Table of Figures are essential for accessibility.

Section 2.1: Graphics and Media Integration

Incorporating images, charts, and even videos can make complex information more digestible. Careful formatting ensures these elements blend seamlessly.

Section 2.2: Professional Layouts

Using themes, styles, and page borders contributes to a polished and consistent document appearance, reflecting attention to detail."

• PRACTICE QUESTIONS 1

and save the document as exercise2.docx

2. Insert your name as the footnote of the document.

• PRACTICE QUESTIONS 2

Type the document:

"The history of computing is a fascinating journey from mechanical calculators to artificial intelligence. Early pioneers like Charles Babbage conceptualized machines that laid the groundwork for modern computers. Ada Lovelace, often credited as the first computer programmer, developed algorithms for Babbage's Analytical Engine. The mid-20th century saw the rise of electronic computers; initially massive machines used for complex calculations during wartime. The invention of the transistor revolutionized electronics, leading to smaller, more powerful, and affordable computers. This technological progression has culminated in the pervasive digital world we experience today, influencing every aspect of modern life, from communication to commerce."

• PRACTICE QUESTIONS 2

i. Create a source for a Book:

- * Author: Walter Isaacson

- * Title: The Innovators: How a Group of Hackers, Geniuses, and Geeks Created the Digital Revolution

- * Year: 2014

- * City: New York

- * Publisher: Simon & Schuster

ii. Create a source for a Website:

- * Author: John Markoff

- * Name of Web Page: Charles Babbage

- * Name of Web Site: Britannica

- * Year: 2023

- * Month: February

- * Day: 10

- URL: <https://www.britannica.com/biography/Charles-Babbage>

• PRACTICE QUESTIONS 2

- iii. At the end of the second sentence ("Early pioneers like Charles Babbage..."), insert an in-text citation for the Britannica website source.
- iv. At the end of the last sentence of the document ("This technological progression has culminated..."), insert an in-text citation for "The Innovators" book source.
- v. Insert a footnote of your name in the document.
- vi. At the very end of the document, on a new page, insert a "Bibliography" (Works Cited style).
- vii. Change the citation style of the document to "APA Referencing style."
- viii. Save your work as "Exercise3.docx".

• PRACTICE QUESTIONS 3

"The digital age has ushered in an era of unprecedented information access, fundamentally transforming how individuals interact with knowledge. From online encyclopedias to academic databases, the sheer volume of data available at our fingertips can be both empowering and overwhelming. Navigating this vast landscape requires critical thinking skills, digital literacy, and the ability to discern reliable sources from misinformation. Educational institutions are increasingly focusing on equipping students with these essential competencies, recognizing that rote memorization is giving way to the skill of information curation and synthesis. As technology continues to evolve, so too must our approaches to learning and information consumption, ensuring that we harness the power of digital tools for societal advancement."

• PRACTICE QUESTIONS 3

- i. Justify the whole of the document.
- ii. Apply two columns to your document, with a line between the columns.
- iii. Drop the first letter of the first paragraph (capital 'T') into two lines of text.
- iv. Shade the second paragraph with a light grey color.
- v. Apply a header with your name on the left and "Exercise 1" on the right.
- vi. Apply a footer with today's date on the left and your student ID on the right.
- vii. Save your work as "Exercise1.docx".

THE END

THANK YOU!!
